

ARTISAN® SEWING MACHINES

BOBBINLESS WALKING FOOT DOUBLE NEEDLE STITCHING MACHINE FOR SIGNS, BANNERS, AND FLAGS

Model
2097-2
Shown with
Optional Folder.

LIFETIME LIMITED WARRANTY

Designed for Bobbinlessly stitching signs, banners, flags and tents, the New ARTISAN® 2097-2 du-AW is the first and truly affordable two needle walking foot sewing system you'll ever need. The stitcher effortlessly sews a type FS-401, double-locked chainstitch seam to finish off your printed products with a professional look on all of your Banners, Signs, and Flags. The 2097 series includes a fully automatic lubrication system, a stitch condenser for locking in your seams, and an adjustable dial type stitch length regulator. You never need to change bobbins because none are used.

The New ARTISAN® 2097 sews with four spools of thread, two in the needles, two for the loopers. Re-threading is a rare task. You'll never again need to check how much thread is left on your bobbins with the ARTISAN® 2097 System.

YOU ARE ASSURED OF PERFECTLY FINISHED SIGNS, BANNERS, AND FLAGS WITH THE ARTISAN® 2097 SERIES.

An ARTISAN® 110 volt Electronic Servo Motor System is standard and helps control your stitching torque and sewing speeds. Stitching from stitch to stitch or variable up to about 2000 stitches per minute, anyone can learn to sew on the ARTISAN® 2097 series. We recommend using ARTISAN® "Premium Performance" twisted, bonded threads from sizes #46 to #138. Normally, thread size z-69 and needle size 149 x 5 #22 are standard. An Adjustable Folder is Optional.

This is the easiest most controllable sign and banner stitching machine you'll ever sew on. We Guaranty it!

Contact ARTISAN® for additional details.
