

ARTISAN® SEWING MACHINES

Extremely Heavy Duty Walking Foot
Stitcher with a Giant Long Beak Oscillating Shuttle Hook

TORO-7334

Sews up to 1¼", Includes Reverse, and a 16½" working area.

The Long Arm Flat-Bed ARTISAN® model 7334 is an Extremely Heavy Duty Walking Foot Stitcher.

Designed to sew very heavy weight products such as heavy cargo tie-downs, parachutes, tents, tarpaulins, buffing wheels, sails, book binding, safety harness, heavy canvas, webbing, balloons, heavy filter bags and all types of extremely heavy textiles.

The walking foot alternating presser feet are mechanically driven and produce an equal distant stitch sewing in a forward or reverse direction. The machine will sew from a very short stitch length up to an amazingly long 1 ¾ stitches per inch.

The 7334 uses the largest bobbin with the most thread capacity available and will easily stitch textiles or webbing up to 1¼" thick.

Most spare parts are interchangeable with similar heavy machines from the past such as a 7-33 or a 733R-5.
